

1. Understand the mechanics of building, and how you build a website. Do you want me to tell you how to fill these spaces now

I can provide a writeup of pages:

About Us

Home

2. Ayla Smart Summaries - multiple slides

3. Remove the use of the word AI anywhere on the website

4. We build a clear pla-

5. The explanation writeups; mentioning processes not companies

6. I need to look into these standards:

Yes. We follow GDPR, HIPAA, and SOC2 standards, encrypt everything, and support role-based access and audit logs. We can also deploy in your own cloud if required.

7. Look at the OverDrive website

8. Look at <https://latenode.com/>

- look at Products section

- how many of these things do you know/think we could figure out how to do

- GDPR Ready and SOC2 Ready

Home Page

- Needs a modified background because using unknown apps is not a good credibility measure
- Find ideas for tagline - still pending, not the most important
- Remove "See our work" link on home page - only 'Book Your Automation Audit'
- Stars emoji by digital solutions for Trades Businesses looks tacky

About us page - skip, shouldn't be 2nd page we see; should be metrics similar to "Who We Are" page on Overdrive site

- remove the serving area market for now
-

2nd page should - Go into systems

(we will have to think about designing these categories) - similar to OverDrive website; this is our "What we do section"

Make the selected work not have the thumbnail photo

Each section will need to be re-designed/written

Look at the build timeline OverDrive has on their website

- Now do you want me to describe like an exact timeline design or is that something you understand and can do

Why Choose Us page disappears - replaced by our version of "Who We Are" page on Overdrive site

Core systems for every business

- invoice
- crm, SEO, website
- marketing
- inbound lead management
- whatever

Custom Solutions for your company

(find smth to add)

Remove 'Tools' page

Remove 'The Team' page (or just move to most bottom)

Keep statistic page for now, we'll think of what to add to it

Awards section - this layout might be good

Testimonials section - I like being able to click through, perhaps could also relate to how we outline our offering (or the timeline)

FAQ -

Who - What businesses are eligible? Who owns the tech stack?

What - What exactly does SwiftBuild do?

~~Where -~~

When - How long does the project take?

Why/How - How can I get started? Do you integrate with the tools I use?

- Yes. We build around your existing stack — CRMs, ERPs, spreadsheets, databases, communication tools, and industry-specific software. We avoid forcing tool changes unless there is a clear reason to upgrade.

Why not just use an off-the-shelf AI tool instead?

Generic tools solve generic problems. If your workflows, data, or approval chains have any specificity to your business, a custom solution will outperform a template every time — and it won't force you to change how you operate to fit someone else's product.

What happens if the solution doesn't perform as expected?

We define success criteria upfront, test thoroughly before handover, and include a post-launch support window. If something isn't hitting targets, we diagnose and fix it. AI systems do need tuning as real-world data comes in, and that's part of the work we do.

Do you offer ongoing support after a project is delivered?

Yes. Most clients choose a retainer for monitoring, updates, and iterative improvements after launch. We can also do a clean handover with full documentation if you prefer to maintain the system in-house. Both options are available.

Contact page

- Let's Build Intelligent Things; change that

Make the fill out the form better

Remove the socials for now

About Us Page

- Remove it
- Core Values go away
- Tools
- this is a great section to work with; instead list of systems/processes we support

Team Members - remove

Trades we Serve

- not sure if this ties to the tools we use?
- similar format to the awards in listing diff companies we have experience with

Deliverables - hold for now

Free Ai Opportunity snapshot? Standardize across website

Common Qs FAQ

- remove the is it really free
-

How about

- Free systems audit
- Basic report free
- Expanded version 4.99, not because

-

https://lovable.dev/projects/26d56cf7-d03a-44a8-b8b5-cc3d99afdec6?magic_link=mc_27cd7789-19cd-4126-9e14-a2103b6b697b

- I like the two buttons - let's book a meeting, or a different CTA
- Next page explains what we do (though I like better how Overdrive has its metrics, we don't want to copy them too closely)

- Name, email, **company**, message
